

HEALTHCARE · AI · MALAYSIA

MedAI

One AI Chat. Every Hospital.

An AI assistant that listens to your symptoms, recommends the right specialist, and books your hospital appointment — all in under 2 minutes.

STAGE

MVP — Ready to Scale

SEEKING

Seed Investment

Booking a doctor is still broken in 2025.

Phone tag

Patients call hospitals during business hours, navigate IVR menus, get put on hold, and still may reach the wrong department.

47 min

average time to book an appointment in Malaysia

Wrong specialist

Patients don't know which specialist to see. GP referrals cause 2–3 extra visits before reaching the right doctor.

62%

of patients see the wrong specialist first

Hospital inefficiency

Hospitals manage appointments manually via call centres. Specialists have gaps in their schedules that go unfilled.

23%

average no-show rate in private hospitals

From symptom to confirmed appointment in 2 minutes.

1

AI Symptom Collection

Patient describes symptoms in plain language. AI collects 6 key anamnesis fields through natural conversation — no forms, no menus.

2

Intelligent Verdict

AI recommends the right specialist type and urgency level (ASAP / this week / routine). Evidence-based, not guesswork.

3

Real-Time Slot Booking

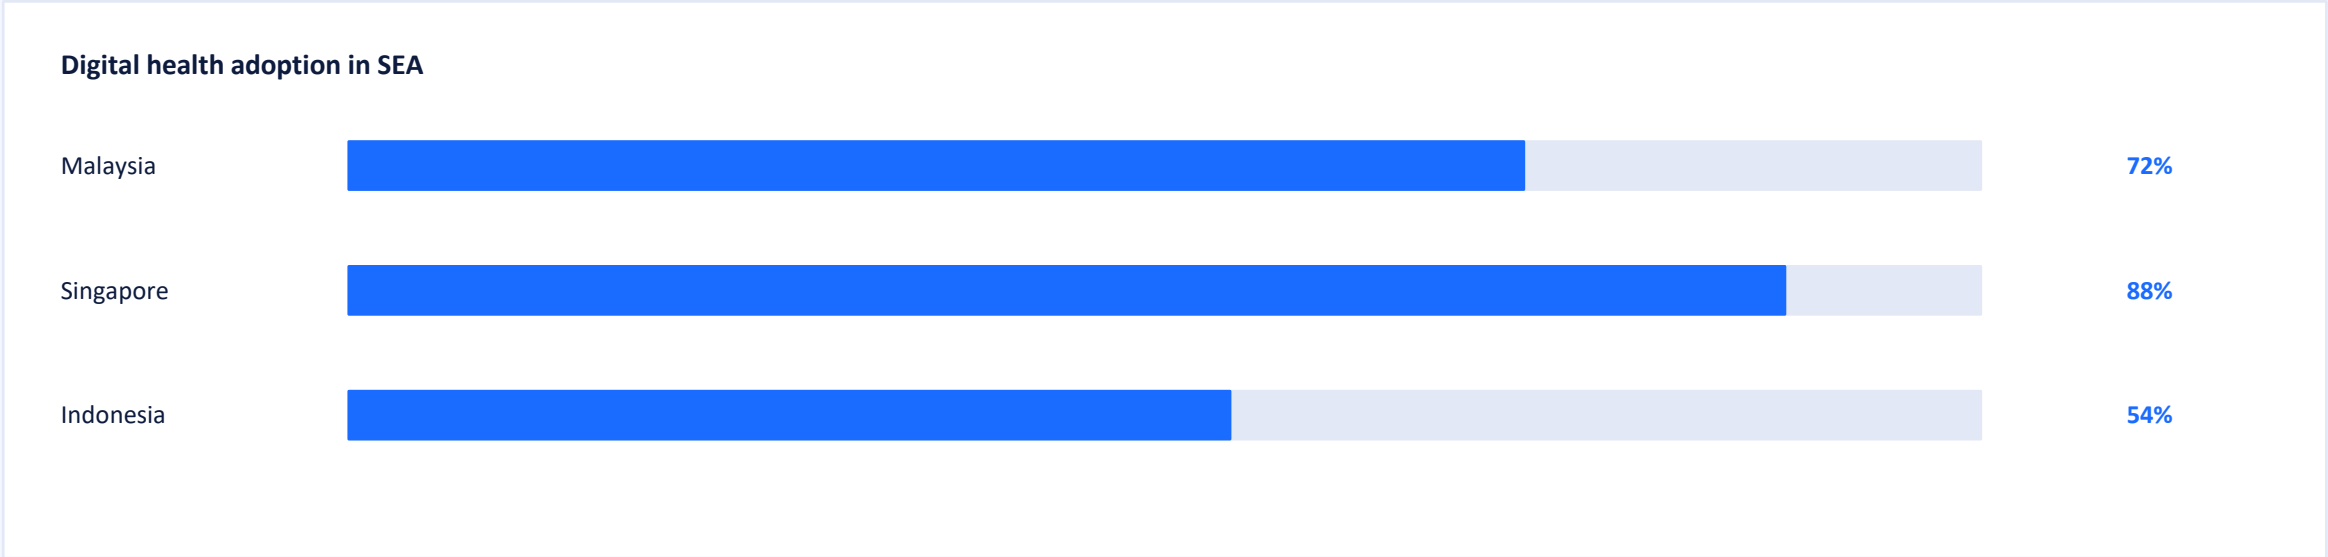

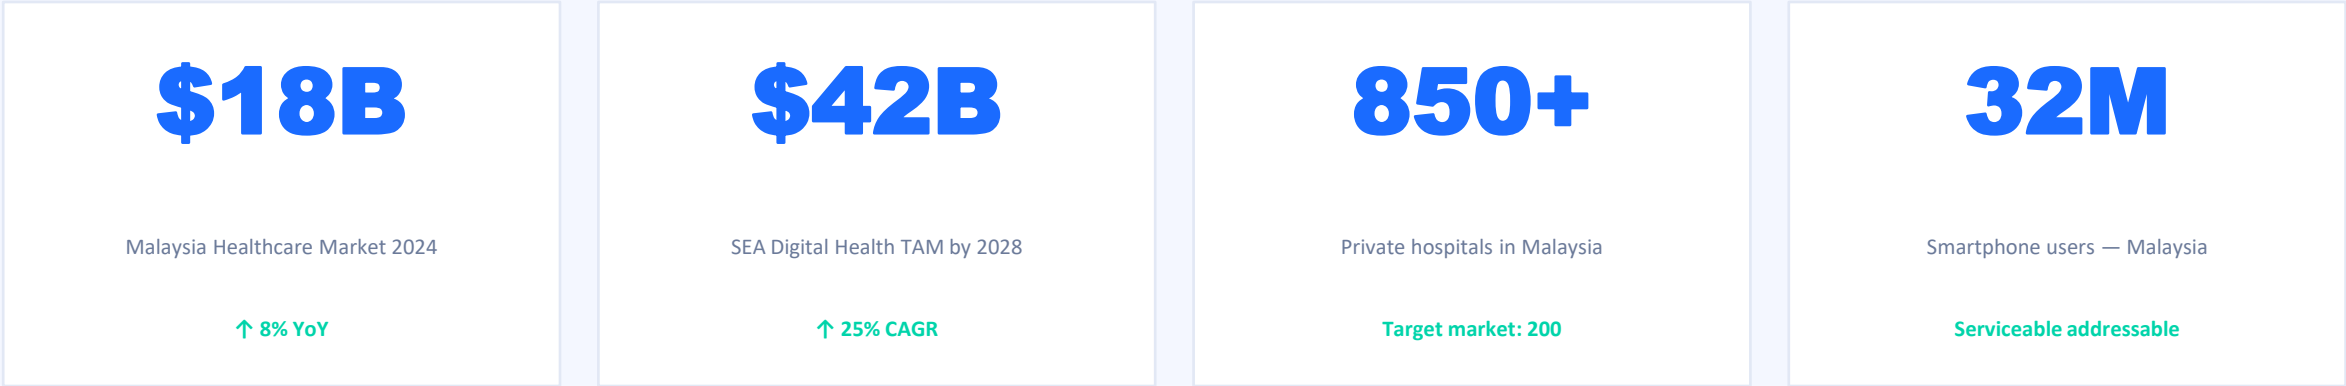

Pulls live availability from connected hospitals. Patient picks a slot, appointment is confirmed in Firestore instantly.

4

Hospital Integration API

Hospitals connect via REST API. MedAI reads specialists + free slots, manages booking lifecycle, receives postback updates.

A massive, underserved market.

Three revenue streams. Growing with every booking.

 Hospital SaaS

RM 500–2,500/mo

Monthly subscription per hospital. Dashboard analytics, API access, integration support. Tiered by number of specialists.

 Per-Appointment Fee

3% per booking

Commission on every AI-booked appointment. Aligns MedAI's revenue with hospital success. Pure transaction model.

 Patient Premium

RM 19.90/mo

Priority booking, medical document storage (unlimited), health history AI summary, appointment reminders.

RM 1,000

Avg monthly revenue per hospital

RM 15

Avg transaction fee per booking

~60%

Gross margin (SaaS)

12 mo

Payback period per hospital

From investment to profit.

Conservative growth path.

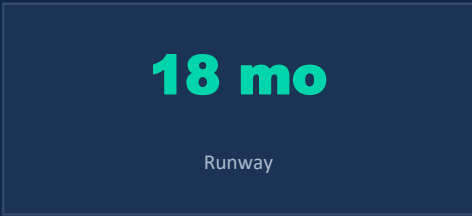

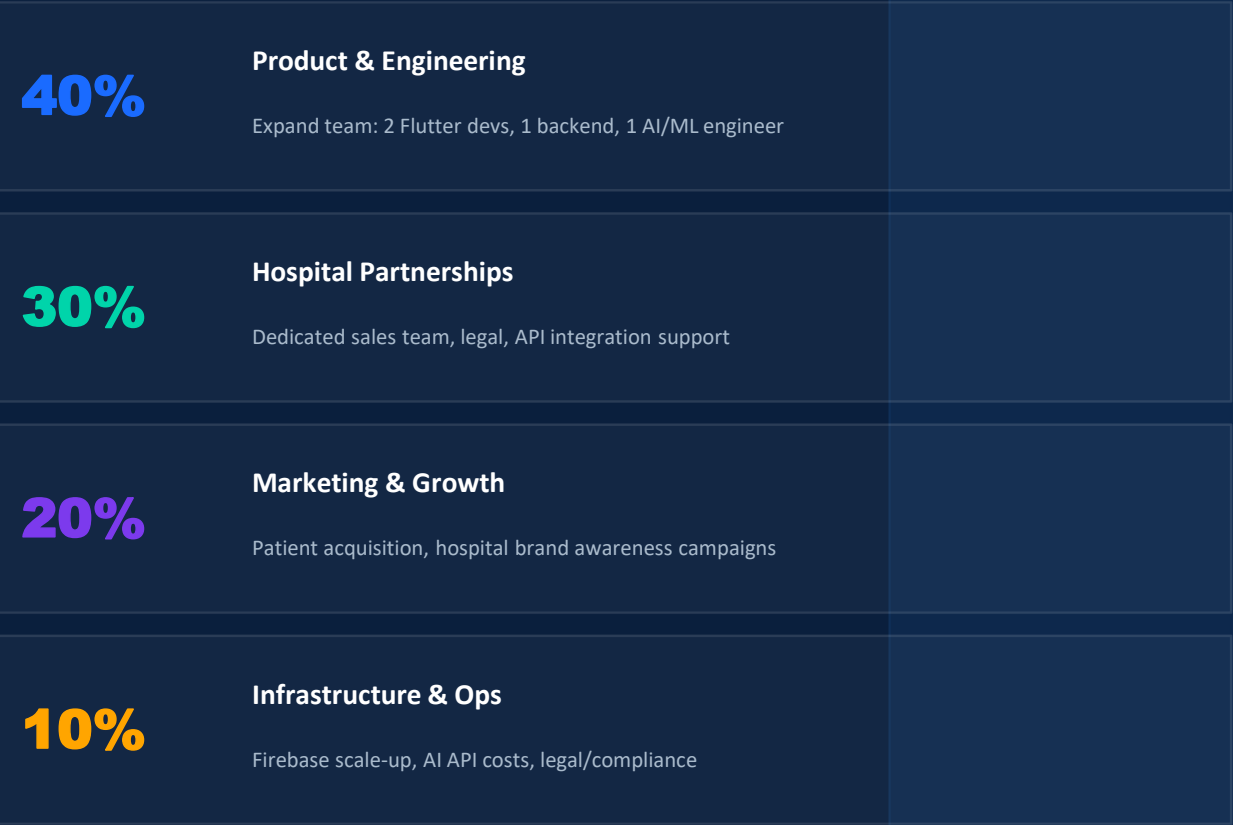

Unit Economics (per hospital)	
Monthly subscription revenue	RM 1,000
Avg bookings/month	150
Transaction revenue (3%)	RM 750
Total monthly revenue	RM 1,750
Cost to serve (infra)	RM 200
Gross profit per hospital	RM 1,550 / mo

Cost Breakdown (Seed Round)	
Engineering team (6 months)	40%
Hospital partnerships & sales	30%
Marketing & user acquisition	20%
Infrastructure & operations	10%
CAC (hospital)	RM 5,000
Payback period	3.2 months

Seed Round — We're ready to scale.

Where your investment goes:

Built different. Defensible moat.

Competitive Comparison

Feature	MedAI	Competitors
AI symptom triage	✓ Full	✗ None
Real-time booking	✓ Instant	~ Manual
Hospital API integration	✓ REST + Postback	✗ Siloed
Document upload in chat	✓ PDF + images	✗ No
Multi-hospital coverage	✓ All in one app	✗ Single hospital

Our Moat

Network effects

More hospitals → better slot availability → more patients → more revenue for hospitals.

AI data flywheel

Every chat improves specialty matching accuracy. Data advantage compounds over time.

Hospital lock-in

Once a hospital integrates their API, switching cost is high. MedAI becomes infrastructure.

LET'S TRANSFORM HEALTHCARE TOGETHER

MedAI

We have the product, the technology, and the market timing.
Help us put AI-powered healthcare in every patient's pocket.
